

CMOS COMPARATORS WITH RAIL-TO-RAIL INPUT AND PUSH-PULL OUTPUT

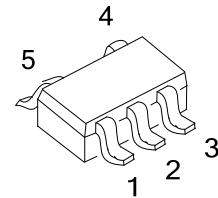

■ DESCRIPTION

The UTC **ULV7211** is micropower CMOS comparator available in the space-saving SOT-25 package.

The UTC **ULV7211** features an input offset voltage of 15mV.

The rail-to-rail input voltage makes the UTC **ULV7211** a good choice for sensor interfacing, such as light detector circuits, optical and magnetic sensors, and alarm and status circuits.

The main benefit of the SOT-25 package is most apparent in small portable electronic devices, such as mobile phones, pagers, notebook computers, personal digital assistants, and PCMCIA cards.
