

ULN62064**LINEAR INTEGRATED CIRCUIT****PRECISION MICROPOWER
SHUNT VOLTAGE REFERENCE****■ DESCRIPTION**

The UTC **ULN62064** is high-voltage, high-current darlington drivers comprised of four NPN darlington pairs.

All units feature integral clamp diodes for switching inductive loads.

For proper operation, the substrate (SUB) must be connected to the most negative voltage.

Applications include relay, hammer, lamp and stepping motor drivers.

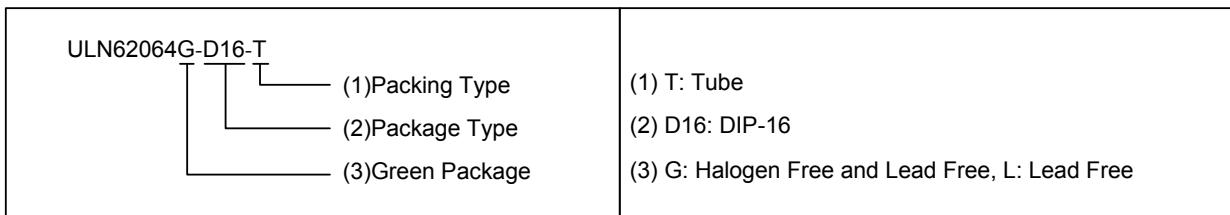

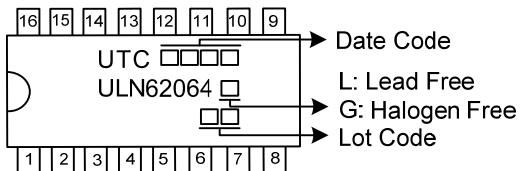

DIP-16

■ FEATURES

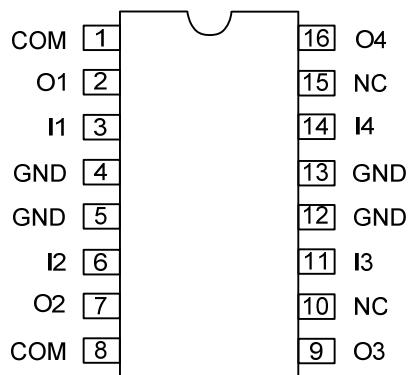

- * Output current (single output): 1.5A (Max.)
- * High sustaining voltage output: 50V (Min.)
- * Output clamp diodes
- * Input compatible with TTL and 5V CMOS
